IN THE HOUSE OF REPRESENTATIVES

MAY 12, 2026

Mr. MOORE of Utah (for himself, Ms. McCLELLAN, and Ms. FOXX) introduced the following bill; which was referred to the Committee on Ways and Means, and in addition to the Committee on Education and Workforce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned

A BILL

To amend subpart 2 of part B of title IV of the Social Security Act to address child welfare involvement caused by reasonable childhood independence activities, to amend the Child Abuse Prevention and Treatment Act to promote childhood independence, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

1 **SECTION 1. SHORT TITLE.**

2 This Act may be cited as the “Promoting Childhood
3 Independence and Resilience Act of 2026”.

4 **SEC. 2. FINDINGS.**

5 The Congress finds the following:

6 (1) American families are being investigated
7 and criminalized under overzealous civil and criminal
8 child neglect laws for letting their children develop
9 resilience and independence. State child protective
10 services agencies are burdened by frivolous reports
11 that undermine reasonable childhood independence,
12 parental rights, and family integrity, and subject
13 children and their caregivers to the trauma of un-
14 necessary and invasive government investigations.

15 (2) In Illinois, a woman was cited for child ne-
16 glect for “inadequate supervision” after allowing her
17 11-, 9-, and 5-year-old children to play in a park
18 near their home.

19 (3) In Maryland, a couple was found respon-
20 sible for unsubstantiated child neglect after allowing
21 their 10- and 6-year-old children to play outside and
22 walk home by themselves.

23 (4) In Georgia, a mother was arrested and ac-
24 cused of reckless conduct when her 10-year-old son
25 walked a mile away from their home without telling
26 anyone.

1 (5) In South Carolina, a mother was arrested
2 for unlawful conduct towards a child for allowing her
3 9-year-old daughter to play alone at a popular, kid-
4 filled park.

5 (6) In North Carolina, a couple was charged
6 with felony involuntary manslaughter and child ne-
7 glect when a driver hit their 7-year-old son and
8 killed him while walking home from a nearby grocery
9 store. They were held on \$1,500,000 bonds each.

10 (7) In Virginia, Child Protective Services inves-
11 tigated a couple numerous times for allowing their
12 three children to play unsupervised outside, telling
13 the parents that the children need to always be su-
14 pervised, even in their own bedrooms.

15 (8) In Pennsylvania, a single mother of two was
16 placed on her State's child abuse registry after
17 tasking her 13-year-old brother to babysit her 1-
18 year-old child.

19 (9) State legislators who have supported State
20 legislation to promote childhood independence have
21 recounted being stopped in their own parenting deci-
22 sions out of fear of child protective services or police
23 intervention. Examples include Michigan State Sen-
24 ator Jeff Irwin's decision to allow a third grader to
25 walk to their nearby school, Colorado State Rep-

1 representative Kim Ransom’s decision to run into a gas
2 station to pay for gas during a snowstorm and leave
3 kids in the van, and South Carolina Senator Wes
4 Climer’s decision to allow a 5-year-old child to be
5 outside in his own yard. In hearings on State legisla-
6 tion across the country, Democrat and Republican
7 legislators remarked on growing up with much more
8 freedom to play, roam, and run errands without con-
9 stant adult management of their whereabouts and
10 activities.

11 (10) Children spend 50 percent less time in
12 unstructured outdoor activities than children in the
13 1970s. The average American child spends 4 to 7
14 minutes a day outside in unstructured play.

15 (11) Less than 25 percent of children between
16 ages 6 and 17 reach the recommended 60 minutes
17 of physical activity each day, and childhood obesity
18 has tripled since the 1970s.

19 (12) Cross-age interactions have been shown to
20 develop social skills and the ability to learn.

21 (13) The percentage of teens who meet up with
22 their friends “almost every day” has been on a
23 steady decline since the 1980s.

24 (14) Face-to-face socializing between teenagers
25 has fallen by over 45 percent from 2003 to 2022.

1 (15) More than half of Generation Z report
2 that as children they felt lonely at least once or
3 twice a month—nearly double the reported number
4 of Baby Boomers when they were young.

5 (16) According to the American Academy of
6 Pediatrics, children are spending an average of 7
7 hours a day on entertainment media, including
8 phones, electronic devices, and television.

9 (17) Excessive screen time for young children
10 increases the risk of attention and behavioral prob-
11 lems, poor sleep, anxiety, depression, aggression, and
12 hyperactivity.

13 (18) As childhood independence and free play
14 have decreased over the decades, the percentage of
15 children suffering from anxiety and depression has
16 increased. The rates of teens with “Major Depres-
17 sive Disorder” and “Generalized Anxiety Disorder”
18 rose by at least 5-fold from 1950 to 1990.

19 (19) Pediatric hospitalizations due to mental
20 health increased by 25 percent between 2009 and
21 2019.

22 (20) Early screen use has been found to lower
23 academic performance.

24 (21) The United States Department of Health
25 and Human Services has prioritized reducing the

1 amount of time that children spend on screens, cit-
2 ing it as a key health improvement priority.

11 (3) sets forth recommendations for how child

16 tivities without direct supervision; and

17 (4) includes a review of whether the risk assess-
18 ment protocols or the investigation or prosecutorial
19 practices of State child welfare systems penalize,
20 threaten, or deter parents who allow their children
